

Locus AG Biologicals

Simply Vital to Farming Success

Locus AG biologicals aren't just nice-to-haves. They're *Simply Vital* to the future success of farmers' operations.

Locus AG leads farmers to greater ROI by introducing vital, beneficial biologicals that drive higher yields for a variety of cropping systems.

But we don't just throw everything at it, hoping something will work. To us, strain specificity matters. Our scientists know that a handful of strong symbiotic strains will outperform many weak, ineffective or competing strains. The result? We only choose 1-5 strains that are scientifically proven to work well together and are specifically formulated for targeted, proven outcomes.

Proven Outcomes:

- ✓ Increased yields & ROI
- ✓ Improved nutrient availability
- ✓ Expanded root growth
- ✓ Enhanced soil quality

PRODUCT OVERVIEW

Superior biologicals with proven outcomes

Rhizolizer®

Boosts yields by creating a strong root system and increasing nutrient uptake in the plant.

Pantego®

Increases the availability of phosphorus, supports extensive root growth, which leads to increased nutrient and water uptake.

TERRADIGM

Increases nutrient uptake and availability of phosphorus. Boosts tensile strength, chlorophyll, and root mass.

Unpac™

Naturally derived glycolipid that helps water enter the soil micropores more freely to break up soil compaction.

Not All Biologicals Are Created Equal

Why should farmers choose Locus AG biologicals?

Superior Development

DESIGNED APPROACH

Crop-beneficial formulations

CURATED STRAINS

Only 1-5 organisms in each of our products

REDUCES WASTE

Products have high-concentration, low-use rates

Superior Usability

EASY TO USE AND IMPLEMENT

Multiple formulations available to fit desired application

FERTILIZER FRIENDLY

Works with and enhances most fertilizers

Superior Modes of Action

ENDOPHYTIC

Travels into the plant to help cells get nutrients where they need to go

SOIL DWELLING

Helps plants tap into nutrients in the ground for stronger roots and increased uptake

Superior Performance

PROVEN RESULTS

Consistently performs well in different soil types

3RD PARTY TRIALS

Committed to coast-to-coast trialing and keeping Locus AG independent

IMMEDIATE IMPACT

Impact on plants starts at application

Our products are 100% made in the USA and available for immediate shipment.
